adapted for our use?	Prefer online Sunday worship	Mary Thompson's Sunday	Sunday morning "Coffee Hour"	How long continue online	What conditions	most important church connections
Not materials or programs ... But we have seen other online worship services that originate in a sanctuary, with the candles being lit, minister and music director in robes, that was inspiring and had the feeling of "worshiping in the house of the Lord". For these services, the empty pews were not part of the picture. The camera focused on the altar/front of the sanctuary, usually with a stained glass window in view. Several people were a part of the services (observing social distancing), minister, music director (not "leading the singing" with his hands, but singing the hymns - with words printed on the screen so at-home worshipers can join in, the organist/pianist, and maybe another reading the scripture lessons. There are lots of ways to create a sense of worship and togetherness. The way ours is done is good and is working for us. But since this survey asked the question above, I thought perhaps I should mention others we have seen, that are also inspiring.	Yes			As long as it takes, to keep our people safe.	Since we both have actually suffered cases of COVID-19, we are hoping to have a more definitive answer from our doctors about when it will be safe for us not to fear bringing harm to others, and whether or not we can get the virus again. At this point, our doctors have told us both that enough time has gone by, after both of us being free of any symptoms, to say that we are now just like everyone else. We need to stay home, not be in gatherings unless necessary, wear masks, like anyone else. (I don't drive, but) my husband is allowed (by doctors) to now be able to drive to a grocery store or drugstore to purchase things that we need (with mask, and observing social distancing). We did go to Baton Rouge Clinic's Lab to have necessary bloodwork (not associated with the virus, just regular blood tests that have had to be postponed because we were both sick). We did that, observing the rules, and came straight home. Gathering in a closed room, (such as our sanctuary) ... ? Not sure how soon we should do that. For one thing, we don't think anyone would want for us to be there! Or any others who've been through the virus.	The Sunday Worship has been an important connection, especially being able to share communion and the blessing of the elements. And having different members doing parts of the service makes the viewer feel that we are together.

Not at this time.	Yes			Early July?	When the number of new cases, nationally and in Louisiana is much lower. A church concern is how you would handle communion. Wearing gloves and mask to prepare is a help but distribution and partaking is another matter, ie at early service everyone putting their hands in communion plate and dipping in same cup and at 11:00 service passing the trays and everyone touching and putting their hands in the bread tray is very concerning to me. Update from Krupala Family...we're finally feeling human again! Vicki tested negative for COVID (Yay!), but Anderson & Vicki had 3-4 weeks of fever, bronchitis & required several rounds of chest x-rays & anti-biotics! James volunteers at COVID testing site weekly (BR General Mid-City) & sees patients at BR Clinic via telemedicine. If people need to be seen, please let them know to call the clinic & they will direct them to their physician to schedule a televisit or 'in person' visit! They follow strict protocol to bring patients into their 'in person' visits...no one waits in a waiting room. They wait in the car until they are called for their appointment. No surgeries scheduled at this time, only small procedures, which are deemed critical.	Vicki Krupala/jkrupala@cox.net

I would like to suggest getting more volunteers to do the "children's sermon" each Sunday, who could read a short Bible story. This would involve our children every Sunday and others who might be OK with recording a session where they read a book.	judy Lester

No one should ever have to look for the link or scroll down to find it. I think the message of the church is important and we can build a large online presence.  In my time at MCCBR I shot and edited an hourly worship service including music sermon prayer.  we had an average of 30 to 60 people at the service every week plus 2500 online viewers every week in 16 different countries. I think broadcasting our weekly service will be a blessing to those who can't make it in and open new venues to people who haven't been to church before. I think we can also make a pitch to get people in the area to attend and increase our physical numbers. there are things we can do to streamline our service and if we go to one service at 10:50 we don't have to worry about sanitizing the sanctuary because the virus cannot last a week on any surface in the sanctuary, having people ready to go to read their parts instead of waiting for them to walk up between readings it's a simple thing that reduces the amount of time necessary for the service, likewise with music and other speakers and events ready to go one after another instead of the lag time between events as we now have during the service. we might need three or four cameras on the sanctuary, one on the pulpit, one on the choir, and one at the back of the church for the wide shot.  it does not have to be super sophisticated at the start, but it will get better every week. And people at home can still contribute as they have been doing for insertion into the service on our giant TV sets that will all fit seamlessly into a webcast. We can either go with live simulcast of the event or a week delay but live Simulcast is better because that is just one less thing that has to be done every week and it's more immediate for the folks.	trd baldwin
